HOTSPOT IR
NON-CONTACT THERMOMETER
USER MANUAL

PLEASE READ THIS MANUAL BEFORE SWITCHING THE UNIT ON. IMPORTANT SAFETY INFORMATION INSIDE.
THE MANUFACTURER RESERVES THE RIGHT TO ALTER THE SPECIFICATIONS OF THE PRODUCT WITHOUT PRIOR NOTIFICATION. THE MANUFACTURER ALLOWS HIMSELF THE RIGHT TO MODIFY WITHOUT ANY PRELIMINARY OPINION THE TECHNICAL SPECIFICATIONS OF THE PRODUCT.
THESE SYSTEMS ARE INTENDED TO BE USED ADJUNCTIVELY NOT AS STANDALONE DEVICES.
1. General Description

The HotSpot IR Non-Contact Thermometer is specially designed to take the body temperature of a person regardless of room temperature. Depending on various skin types and thickness, there may be temperature difference.

2. Safety Information

- Only use the device for the purposes described in this instruction manual.
- Only use the device in an ambient temperature range between 10 °C and 40 °C.
- Do not expose this thermometer to electric shocks.
- Do not expose the thermometer to extreme temperature conditions of > 50 °C or < 0 °C.
- Do not use the device in relative humidity higher than 85%.
- Do not use the device near large electromagnetic fields such as found with cordless or cell phones.
- Keep the device away from water and heat, including direct sunlight.
- Do not drop or throw the device.
- Do not use the device if it is damaged.
- The accuracy of measurements may be affected when the face is covered by hair, perspiration, a cap, or a scarf (See Part 10-4).
- Keep the measuring distance between 5 cm - 15 cm (2”-5.9”) (See Part 10-4).
- The infrared thermometer should be left in a room 15 to 20 minutes before using.
3. Features

- Precise non-contact measurements
- User selectable °C or °F
- Selectable Body and Surface temp
- Set Alarm value
- Memorization of the last 32 measurements
- Automatic Data Hold & Auto power off
- Display Resolution 0.1 °C (0.1 °F)
- Back-light LCD display
4. Intended Use

Non-Contact IR Thermometer is designed for body surface and temperature measurement for infants and adults without coming into contact with the human body.

Non-Contact IR Thermometer can also be used to measure the temperature of a baby-bottle or bath, or room temperature (by using the Surface Temp function).

4-1. Normal Temperatures According to Measurement Method

<table>
<thead>
<tr>
<th>Measurement Method</th>
<th>Normal Temp °C</th>
<th>Normal Temp °F</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rectal</td>
<td>36.6 to 38</td>
<td>97.8 to 100.4</td>
</tr>
<tr>
<td>Oral</td>
<td>35.5 to 37.5</td>
<td>95.9 to 99.5</td>
</tr>
<tr>
<td>Axillary</td>

9. Calibration Instructions

For stable and reliable results, the thermometer provides a user-correction function.

9-1. Check the Device Calibration

Verify calibration as follows:

1. Take the temperature of a person using a conventional thermometer; example: you get 37 °C (98.6 °F).
2. Take the temperature of the same person using the HotSpot IR Non-Contact Thermometer keeping 5 to 15 cm (2” to 5.9”) distance between the thermometer and the person. If you get 37 °C (98.6 °F), the HotSpot IR Non-Contact Thermometer is properly set and ready for use.

If you get a lower or higher temperature, 38.1 °C (100.6 °F) for example, you should re-calibrate the HotSpot IR Non-Contact Thermometer.

9-2. Calibrate the Device

To calibrate the device:

1. Press the MODE button for 2 seconds. The screen will display F1.
2. Press MODE button again until you get F3.
3. Press ▲ button in order to add the difference (in our example, 1.1 °C – 2.2 °F).
4. Repeat steps 1 - 5 until readings from conventional thermometer and HotSpot IR Non-Contact Thermometer are the same.

TAKE CARE TO REMOVE ANY OBSTACLE WHICH COULD ALTER THE MEASUREMENT (HAIR, PERSPIRATION, ETC.)
10. Use

1. Install battery.
2. For first use or when inserting new batteries, wait 10 minutes for the device to warm-up.
3. If the device is not used for a long time, the device will delay turning on for one or two seconds in order to first test the room temperature.
4. Aim toward a person’s inner canthus keeping 5 to 15 cm (2” to 5.9”) distance between the thermometer and the person, press the measuring key, and the temperature will display immediately (see the Figure 1 below for the positioning).
5. When the room temperature is significant difference, or there is perspiration on the forehead, you can take the temperature behind the ear lobe (see the Figure 2 below for the positioning).

Figure 1

Figure 2
11. Measuring Operations

11-1. Choosing the Temperature Unit – F1 Function

1. Press MODE button for 2 seconds, screen will display: F1.
2. Press ▼ for degrees Celsius, ▲ for degrees Fahrenheit.

11-2. Alarm Setup – F2 Function

1. Press MODE button for 2 seconds, screen will display: F1.
2. Press MODE again to get to F2.
3. Press ▲ to increase the threshold by 0.1 °C (0.1 °F).
4. Press ▼ to reduce it by 0.1 °C (0.1 °F).

THE ALARM THRESHOLD DEFAULT VALUE IS 38°C (100.4°F).

11-3. Calibration – F3 Function

To adjust the calibration of your thermometer:

1. Press MODE button for 2 seconds, screen will display: F1.
2. Press MODE twice to get F3.
3. Press ▲ to increase the difference by 0.1 °C (0.1 °F).
4. Press ▼ to reduce the difference by 0.1 °C (0.1 °F).

IN THE CASES OF SEASONAL OR ENVIRONMENTAL CHANGES A VERIFICATION AND ADJUSTMENT SHOULD BE CARRIED OUT. THIS FUNCTION IS ONLY EFFECTIVE IN BODY MODE.

11-4. Buzzer ON/OFF – F4(F3) Function

1. Press MODE button for 2 seconds, screen will display: F1.
2. Press three (two) times MODE button to get F4 (F3).
3. Press ▲ to open the buzzer. An icon is displayed.
4. Press ▼ to turn off the buzzer (icon will disappear).

11-5. Exiting The Setting Mode

1. Press MODE button until the screen turns off.
11-6. The HotSpot IR Non-Contact Thermometer is specially designed to take the body temperature of a human being. For this, use the Body mode. Measurement range for Body mode: 32 to 42.5 °C (86°F to 108 °F).

You can also use the thermometer to measure the temperature of an object, a food, a liquid or a room. For this, use the Surface mode. Measurement range for Surface mode: 0 to 60 °C (32 °F to 140 °F)

MAKE SURE TO SELECT THE BODY MODE FOR AN SKIN TEMPERATURE READING AND THE SURFACE MODE FOR AN AMBIENT OR OBJECT READING.

11-7. Data Collection

Data collection happens automatically after taking temperature measurements and will display at the right corner of LCD. Press ▲ or ▼ button to display the last temperature measurement. When the device is powered off, press ▲ and ▼ button together for two seconds to display the last temperature measurement. Change the order number to 0 and press MODE button to delete all collection data.

11-8. Changing The Batteries

When the LCD screen displays "галочка", the battery needs to be replaced. To replace battery open the lid and change the batteries, taking great care with the correct positioning.

Placing the batteries into the device backwards can cause damage to the device and compromise the accuracy of your HotSpot IR Non-Contact Thermometer. Never use rechargeable batteries. Remove the battery from the instrument when not in use for extended periods of time to avoid damage to the thermometer.

11-9. Device Life

The HotSpot IR Non-Contact Thermometer was conceived for professional use. Its longevity is guaranteed for 40000 measurements.
12. Advice

- The protective glass over the lens is the most fragile part of the thermometer. Be careful with it.
- Do not attempt to recharge non-rechargeable batteries.
- Do not throw the device in a fire.
- Do not expose the thermometer to extreme sunlight or water.

13. Maintenance and Cleaning

- The infrared sensor is the fragile. Be careful with it.
- Clean the device with a cotton swab lightly moistened with 70% alcohol.
- Do not clean the device with a corrosive detergent.
- Keep the device away from water or other liquids.
- Store the device in a dry environment.
- Keep the device away from dust and direct sunlight.
14. Troubleshooting

If you happen to have problems while using your the non-contact IR thermometer refer to guide below to help resolve the issue. Contact customer service at support@infraredcameras.com if problems persist.

Strange Readings when taking Skin Surface Temperatures

If you are using Surface mode, the temperature displayed is showing the ambient temperature and not the surface skin temperature measurement.

Message “HI”

The analysis is above the measurement range selected, either above 42.5 °C (108 °F) in Body mode or below 60 °C (140 °F) in Surface mode.

Message “LO”

The temperature analyzed is under the measuring range selected, either the measurement is less than 32 °C (90 °F) in Body mode or less than 0 °C (32 °F) in Surface mode.
### Message Warnings

<table>
<thead>
<tr>
<th>Reasons for “LO” or “HI” message</th>
<th>See <strong>Troubleshooting</strong></th>
</tr>

15. Conformity Standards

- EN12470-5 and ASTM E1965-1998
- EN 980: Graphical symbols for the labeling of devices
- EN 1041: Information supplied by the manufacturer

EMC Statement

This device has been tested and homologated in accordance with EN60601-1-2:2007 for EMC. This does not guarantee in any way that the device will not be affected by electromagnetic interference. Avoid using the device in high electromagnetic environment.

The ELECTRICAL EQUIPMENT needs special precautions regarding EMC and needs to be installed and put into service according to the EMC information provided in the ACCOMPANYING DOCUMENTS.
16. About ICI

INFRARED CAMERAS INC.
2105 W. Cardinal Dr.
Beaumont, TX 77705

Phone: (409) 861-0788 | Toll Free: (866) 861-0788 | International: (409) 861-0788

General Inquiry: support@infraredcameras.com
Website: www.infraredcameras.com

You may reach a representative by phone or email Mon – Fri 8:00AM - 5:00PM CST.

ICI manufactures complete systems and software. We can provide complete engineering, software, and OEM solutions. Our Fortune 500 clients rely on us for infrared equipment and thermography training (which we offer through the Infrared Training Institute).

In addition to providing custom germanium, silica, and sapphire optics, we also build windows for enclosures, as well as custom pan and tilt units. We can even provide customizable explosion proof systems.

Our knowledge and experience stems from years of using infrared imaging and temperature measurement instruments to provide solutions to: managers, engineers, scientists, inspectors and operators in space, power companies, medical, pulp and paper, food industry, research and development, and various process industries. You can see our products and services used in industrial, commercial, and government applications worldwide. Additionally, our ICI 7320 was awarded “Product of the Month” by NASA*. Originally named Texas Infrared (still DBA), Infrared Cameras Inc. has been in business since March, 1995.

Thank you for your dedicated and continued support.
